Nautify

Boat maintenance schedule

Boat: _____

Job	How often	For	Done on	Done on	Done on	Done on
Antifouling Antifouling paint so marine growth doesn't stick to the hull.	Every year	Boats kept afloat				
Hull cleaning Thorough cleaning and check of the hull, propeller and shaft.	Every year	Boats kept afloat				
Anode replacement Anodes protect the underwater metal parts from corrosion.	Every year	Boats kept afloat				
Engine service Oil, filters and belts; on outboards, also the gear oil.	Every year	Boats with an engine				
Impeller replacement The cooling water pump: if it fails, the engine overheats.	Every year	Boats with an engine				
Rigging inspection Shrouds, stays, terminals and turnbuckles.	Every 2 years	Sailboats and catamarans				
Batteries and electrics Battery health, charger and connections.	Every 2 years	All boats				
Safety equipment Extinguishers, flares, life raft and life jackets up to date.	Every year	All boats				
Winterization Get the boat ready to spend the winter on land: engine, water and covers.	Every year	Boats laid up ashore				

Intervals are a guide: your engine and boat manuals always come first.
